

Freese and Nichols University presents

Innovative Funding Seminar

Description:

Class participants will learn about select grant and loan opportunities that are available for stormwater, transportation, water resources, water and wastewater studies and projects. Participants will learn how to get their projects considered for inclusion in the H-GAC's Transportation Improvements Program (TIP). The class will work in small groups to apply the information learned about funding programs to applied scenarios.

Content:

- Selected Federal and State grant and loan programs
- Success stories
- Anticipated challenges
- Applied scenarios

Wednesday, August 21, 2013
